Index to Volume 62

The Journal of Heredity, 1971

Ackerman, W. L., A chromosomal translocation in a diploid camellia, 121.
Additional studies with tomato mutant, curl, Leonard J. Alexander, Gene L. Oakes, and Carol A. Jaberg, 197.
Albino and nonpolyploid mutants induced by colchicine in sorghum, E. K. Beraho and R. J. Olembo, 376.
Alexander, Leonard J., *et al.*: Additional studies with tomato mutant, curl. 197; The production of two needed mutations in tomato by irradiation, 311.
Analysis of events leading to heterofertilization in maize, K. R. Sarkar and E. H. Coe, Jr., 118.
Anderson, M. K., *et al.*, Anthocyanidin floral pigmentation in red clover, 13.

Animal Genetics:

Ambystoma maculatum, karyotype and chromosome morphology of embryos, 161.
Cats: white fur, blue eyes, and deafness, 171; XXY sex chromosome constitution in a Himalayan with tortoiseshell points, 220.
Cattle, heritability of live and carcass characters in a crossbred beef herd, 123.
Cockroach, pale-body and bulge-eye in *Blattella germanica*, 110.
Dogs: differentiation of male meiotic chromosome stages, 17; lethal glossopharyngeal defect, 291.
Dove, cellular esterases in ringneck, 44.
Drosophila: scanning electron microscopy, 41; microorganismal basis of infectious hybrid male sterility in *D. paulistorum*, 67; behavioral differentiation of three races of *D. auraria*, 117; epistasis of eye colors in *D. melanogaster*, 131; genetic effects of low frequency stress on *D. melanogaster*, 157; new technique for manipulation and study of *D. melanogaster*, 203; sex ratio compensation in *D. melanogaster*, 205; heterochromatin pattern in metaphase chromosomes of *D. melanogaster*, 285; genetic control of esterase-A in *D. melanogaster*, 345; environmental influences on meta-female viability in *D. melanogaster*, 334; epistasis in wing mutants of *D. melanogaster*, 387.
Fowl: association of brachydactyly and ptilopody in chickens, 28; cytogenetic studies of hereditary autoimmune thyroiditis in chickens, 186; melanotic chickens—key to a pigmentation enigma, 215.
Fox, karyotype of American red, 318.
House fly: technique for revealing hidden heterozygosity on autosome 3, 45; orientation and position of the linkage map on chromosome 3, 246.
Mice: long term selection for body weight, 228; three syndromes produced by tottering and leaner mutant genes, 297; transferrin and haptoglobin inheritance in *Peromyscus*, 339; recessive nonagouti deer mice, 372.
Milkweed bug, mutants on sunflower seed: viability and eye-color interactions, 315.
Mosquito: phenogenetics of homeotic mutant, proboscipedia in *Aedes albopictus*, 3; linkage group—chromosome correlation in *Culex tritaeniorhynchus*: inversions, 31; translocations, 90; esterase polymorphism in a natural population of *Anopheles punctipennis*, 259.
Pigs, hereditary splayleg, 250.
Primates: rhesus monkey blood group systems: G and H blood groups, 79; I blood group, 142; J-O blood groups, 239; Y chromosome does not fluoresce in *Pan paniscus*, 245.
Rabbits: mandible prognathism, 23; hypogonadia, 63; cortical renal cysts, 105; glucose metabolism in buphthalmic, 294.
Rats: pleiotropic expression of restricted coat-color gene, 357; XO female in Indian mole rat, 384.
Sheep, frequencies of various birth defects in Rambouillet, 223.
Streptopelia decaocto (Columbiformes), somatic chromosomes, 373.
Animal genetics: quantitative theory and experimental results (Rev.), Gordon Dickerson, 135.
Anthocyanidin floral pigmentation in red clover, N. L. Taylor, C. J. Keller, M. K. Anderson, and W. A. Kendall, 13.
Arakaki, D. T. and D. W. Vogt, Karyotype of the American red fox (*Vulpes fulva*), 318.
Award of Meyer Memorial Medal to Erna Bennett of FAO, 277.
Ayala, Francisco J. and Catherine T. Falk, Sex of children and family size, 57.

Baker, Richard H., *et al.*, Linkage group—chromosome correlation in a mosquito: inversions in *Culex tritaeniorhynchus*, 31; Translocations in *Culex tritaeniorhynchus*, 90.
Barnes, D. K.: *et al.*, Description and inheritance of a tumor trait on stem cuttings of alfalfa, 189; and G. R. Buss, Inheritance of yellow and white seedlings in diploid alfalfa, 342.
Barrow, Jerry R., Meiosis and pollen development in haploid cotton plants, 139.
Behavioral differentiation of three races of *Drosophila auraria*, Joseph Grossfield, 117.
Beraho, E. K. and R. J. Olembo, Albino and nonpolyploid mutants induced by colchicine in sorghum, 376.
Bergsma, Donald R. and Kenneth S. Brown, White fur, blue eyes, and deafness in the domestic cat, 171.
Bernard, R. L. and C. R. Cremeens, A gene for general resistance to downy mildew of soybeans, 359.
Blackley, C. C. and K. S. McWhirter, A genetics crossword, 381.
Bloom, Stephen E., Cytogenetic studies of hereditary autoimmune thyroiditis in chickens, 186.
Boehm, Larry G. and M. R. Irwin, Cellular esterases of the ringneck dove, 44.
Bovard, K. P., Participants in isogenic-stock symposium, 348.

Peroxidase isozymes in the developing endosperm of maize, A. Padma and G. M. Reddy, 252.
Peroxidase regulation by the 3-dwarf height locus in sorghum, K. F. Schertz, Nadine A. Sumpter, Igor V. Sarkissian, and G. E. Hart, 235.
Phenogenetics of the homeotic mutant proboscipedia in *Aedes albopictus*, Thomas C. Quinn and George B. Craig, Jr., 3.

Plant Genetics:

Aegilops, nucleo-cytoplasmic interactions involving *Ae. speltoides* cytoplasm and *Triticum aestivum* genomes, 149.
Alfalfa: inheritance of tumor trait on stem cuttings, 189; inheritance of yellow and white diploid seedlings, 342.
Apple, genetic susceptibility to *Glomerella* leaf blotch, 303.
Arabidopsis thaliana, advantages of growing test material in miniature containers, 54.
Barley, pleiotropic effects of uzu and spike-density genes in a cross, 153.
Brassica campestris, genetics of four hypocotyl mutants, 248.
Camellia, chromosomal translocation in a diploid, 121.
Chickpeas, heritability and number of genes controlling flower size, 209.
Citrus, origin, identification, and possible use of unexpected triploids, 329.
Claytonia virginica, meiotic chromosomal variation, 379.
Clover: anthocyanidin floral pigmentation in red, 13; leaf markings in white, 307.
Cotton: cytoplasmic effects on anther numbers in interspecific hybrids of *G. herbaceum* and *G. harknessii*, 77; meiosis and pollen development in haploid plants, 139.
Douglas-fir, white seedling pigment mutation affecting seed dormancy, 127.
Freesia, method of obtaining virus-free strains, 52.
Genetic variability, broadening the base of, 265.
Lettuce, downy mildew immunity as genetic marker in breeding, 316.
Maize: analysis of events leading to heterofertilization, 118; peroxidase isozymes in developing endosperm, 252.
Mentha, inter-subgeneric hybrids, 363.
Neurospora crassa, continuous selection for increased linear growth rate, 87.
Nicotiana: production of homozygous diploid plants by tissue culture in *N. tabacum*, 59; introgressive hybridization, 265; locus homology in *N. longiflora* Cav. and *N. plumbaginifolia* Viv., 288.
Onion, bulb size and shape in half-sib families, 101.
Osmunda regalis, evidence for duplicated locus, 367.
Peppers, new sources of cytoplasmic male sterility in *Capsicum annuum* L., 254.
Potato: location of a mutant gene causing albinism in a diploid, 207; nucleolar trisomic and trisomic transmission in diploid, 375.
Roses: recurrent blooming in *Rosa wichuraiana*, 203; recurrent and nonrecurrent blooming in 'Goldilocks' × *Rosa wichuraiana* progeny, 319.
Sericea, inheritance of dwarf character in *Lespedeza cuneata*, 130.
Sheep laurel, gene controlling pigmentation in *Kalmia angustifolia*, 201.
Sorghum: inheritance of Manhattan leaf spot no. 2, 193; peroxidase regulation by the 3-dwarf height locus, 235; colchicine-induced albino and nonpolyploid mutants, 376.
Soybeans, gene for general resistance to downy mildew, 359.
Spinach, sex chromosome variation, 349.
Tomato: estimation of linkage between genes for fruit shape, beaked fruit, sepal shape, and sepal length, 37; curl mutation, 197; production of two needed mutations by irradiation, 311.
Tradescantia, somatic mutations in petals and stamen hairs of clone 02 *Tradescantia*: a search for genetic identity, 323.
Tripsacum dactyloides, cytological study, 280.
Triticum, nucleo-cytoplasmic interactions involving *Aegilops speltoides* cytoplasm and *T. aestivum* genomes, 149.
Wheat, male-sterile wheat with rye cytoplasm, restoring male fertility and plant vigor, 353.

Pleiotropic effects of uzu and spike-density genes in a barley cross, Paul H. Hoskins and J. M. Poehlman, 153.
Pleiotropic expression of the restricted coat-color gene in the Norway rat, Laurence G. Gumbreck, Allan J. Stanley, Randolph M. Macy, and E. Edward Peeples, 357.
Plough, H. H., Evolution and genetics: a tribute to Th. Dobzhansky (Rev.), 61.
